Data Fusion Applications

Workshop Proceedings
Brussels, November 1992

Springer-Verlag

ESPRIT, the European Specific Research and Technological Development Programme in the field of Information Technologies, was set up in 1984 as a cooperative research programme involving European IT companies, large and small, and academic institutions. Managed by DG III of the European Commission, its aim is to contribute to the development of a competitive industrial base in an area of crucial importance for the entire European economy. The current phase of ESPRIT (the third) comprises five technological areas (Microelectronics, Design and Engineering Technology for Software-Intensive Systems, High-Performance Computing and its Applications, Advanced Business and Home Systems plus Peripherals, Computer-Integrated Manufacturing and Engineering), Basic Research and the Open Microprocessor Systems Initiative, which draws on all other areas of the programme. The series *Research Reports ESPRIT* is helping to disseminate the many results - products and services, tools and methods, and international standards - arising from the hundreds of projects, involving thousands of researchers, that have already been launched.

Contents

Combining Two Imaging Modalities for Neuroradiological Diagnosis: 3D Representation of Cerebral Blood Vessels	1
<i>M. Bahner, J. Dick, B. Kardatzki, H. Ruder, M. Schmidt, A. Steitz, C. Bertram, D. Hentschel, T. Hildebrand, E. Hundt, R. Kutka, S. Stier, G. Gerig, T. Koller, O. Kübler, G. Szekely</i>	
Hybrid Inference Components for Monitoring of Artificial Respiration	17
<i>K. Gärtner, S. Fuchs, H. Jauch</i>	
* Information Fusion in Monitoring Applications using the Category Model	27
<i>W. Steinke</i>	
A Flexible Real-Time System for Vessel Traffic Control and Monitoring	38
<i>L. Stefanelli</i>	
ESPRIT Project AZZURRO: Data Fusion for Marine Protection	44
<i>S. Ghelfo</i>	
ESPRIT Project DIMUS: Data Integration in Multisensor Systems	50
<i>F. Benvenuto, M. Ferrettino, M. Pasquali, F. Perotti, P. Verrecchia</i>	
A Reflex-Based Approach to Fusion of Visual Data	61
<i>A. Bozzoli, M. Rossi, R. Barbò, B. Caprile, G. Carlevaro</i>	
Sensor Fusion in a Peg-In-Hole Operation with a Fuzzy Control Approach	71
<i>J. Zhang, J. Raczkowski</i>	
Fuzzy Logic Techniques for Sensor Fusion in Real-Time Expert Systems	79
<i>J.A. Aguilar-Crespo, J. M. Domínguez, E. de Pablo, X. Alamán</i>	
Task-Directed Sensor-Planning	87
<i>G. Grunwald, G.D. Hager</i>	

Incremental Map-making in Indoor Environments	102
<i>A. Ekman, D. Strömberg</i>	
Image Segmentation Improvement with a 3-D Microwave Radar	115
<i>A. Siebert, J. Ostertag, B. Radig,</i> <i>M. Rozman, J. Detlefsen, J. Bernasch</i>	
A Vectorial Definition of Conceptual Distance for Prototype Acquisition and Refinement	123
<i>C. Moneta, G. Vernazza, R. Zunino</i>	
Distributed Knowledge-based Systems for Integration of Image Processing Modules	133
<i>C. Regazzoni</i>	
Spatial Fusion of Multisensor Visual Information for Crowding Evaluation	155
<i>M. Peri, C. Regazzoni, A. Tesei, G. Vernazza</i>	
Robust Multisensor Fusion in Underground Stations	172
<i>S. Pfleger, A. Milano</i>	
On Tracking Edges	183
<i>M. Tistarelli</i>	
Force and Position Sensing Resistors: An Emerging Technology	196
<i>J. Hagen, M. Witte</i>	
Fusing Two Views using Object Motion	204
<i>D. Hogg, A. Baumberg</i>	
Mobile Robotics for the Surveillance of Fissile Materials Storage Areas: Sensors and Data Fusion	214
<i>J. G. M. Gonçalves, G. Campos, V. Santos</i> <i>V. Sequeira, F. Silva</i>	
Data Fusion for Environmental Monitoring	246
<i>T. Wittig, H.-N. Pham</i>	
Concluding Remarks: Advanced European Research on Data Fusion	262
<i>K.C. Varghese, S. Pfleger</i>	
Contributors	266
